Why wait for college?

Get the most in-demand skills NOW!

UC San Diego Extension and the San Diego Public Library are offering introductory programming courses in Python, virtual reality and video gaming.

These 10-week courses are aimed at high school students who want to get real, practical skills in cutting-edge technologies.

Participants will receive pre-college credit and set themselves apart from their peers.

To find out more, email k12@ucsd.edu.
